**Accommodations:**  
Travel arrangements  
including hotel are the  
responsibility of the  
registrant.

This 1.5-day course is the first specific exterior wall course that builds upon the fundamentals presented in Exterior Walls Technology and Science.

The purpose of this course is to provide an in-depth understanding of masonry wall systems as they are designed as part of the building envelope system. Highlights of this program include: materials and their properties, masonry accessories, applicable design codes and standards, design and construction requirements, evaluating and repairing masonry wall problems, and maintaining masonry walls.

This in-depth course is recommended for those who have taken Exterior Walls Technology and Science, and want to further expand on their knowledge of exterior wall systems. Masonry Wall Systems will also serve as a good review course for those interested in taking the Registered Exterior Wall Consultant exam.

<b>Educational Credit</b>	<ul style="list-style-type: none"> <li>• 12 Educational Hours from RCI</li> <li>• 12 Learning Units from the American Institute of Architects (AIA) – (including Health, Safety and Welfare Credit)</li> </ul>
